Receipt and completeness checks

Candidate ID: _____ Checked by: _____ Date: _____

Receipt, readability and completeness must be recorded separately from the academic mark. A checked item records presence or inspection; it does not establish achievement of a marking criterion.

Item	Required check	Present / action
Coursework cover sheet	Identity and signed declaration completed	
AI-use declaration	Permitted use or nil declaration recorded	
PDF report	Python analysis, design, tests, evaluation and maintenance	
Python files	Complete source; required resource dependencies included	
Database report evidence	Clues and Games structures, primary key, ClueID relationship and validation tests	
Native database	Two tables, keys, relationship and required companion files	
Excel workbook	Working formulas, recommendations and limitation	
References	External sources acknowledged	
Safe opening	Centre-approved environment used; no unknown macros enabled	
File reconciliation	Report and working filenames match the submission	

Missing or unreadable items and action: _____

This checklist records receipt and readability. It does not replace academic marking. Submitted code and database automation must be opened only in an appropriate centre-approved environment.
